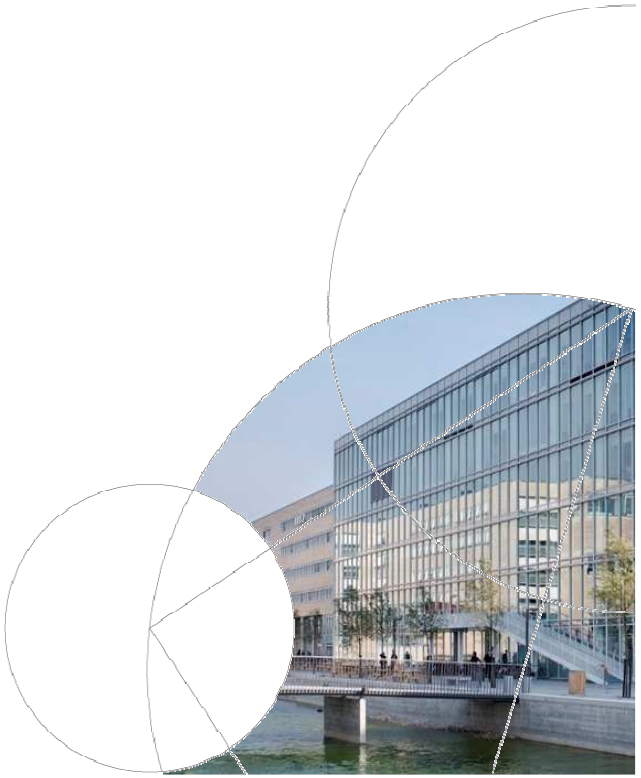
Nordic - Chinese R&D collaboration in energy and climate

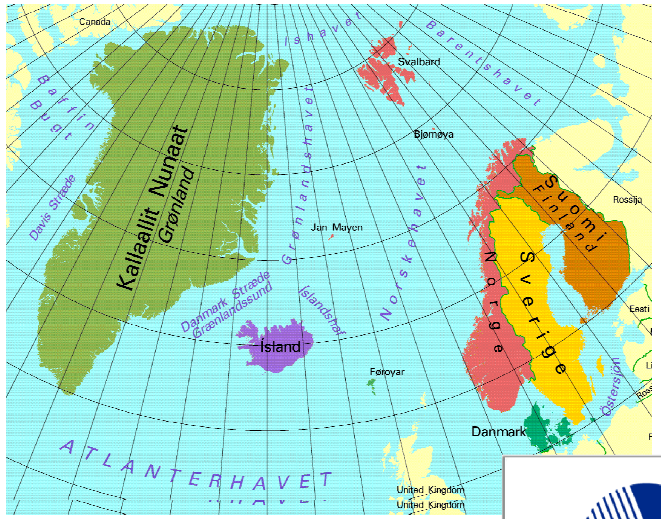
Jørgen Delman, Professor
China Studies

Nordic-Chinese Energy & Climate Day

Shanghai World EXPO, 25 June 2010



The Nordic countries and China – collaboration in energy, renewable energy, climate….?

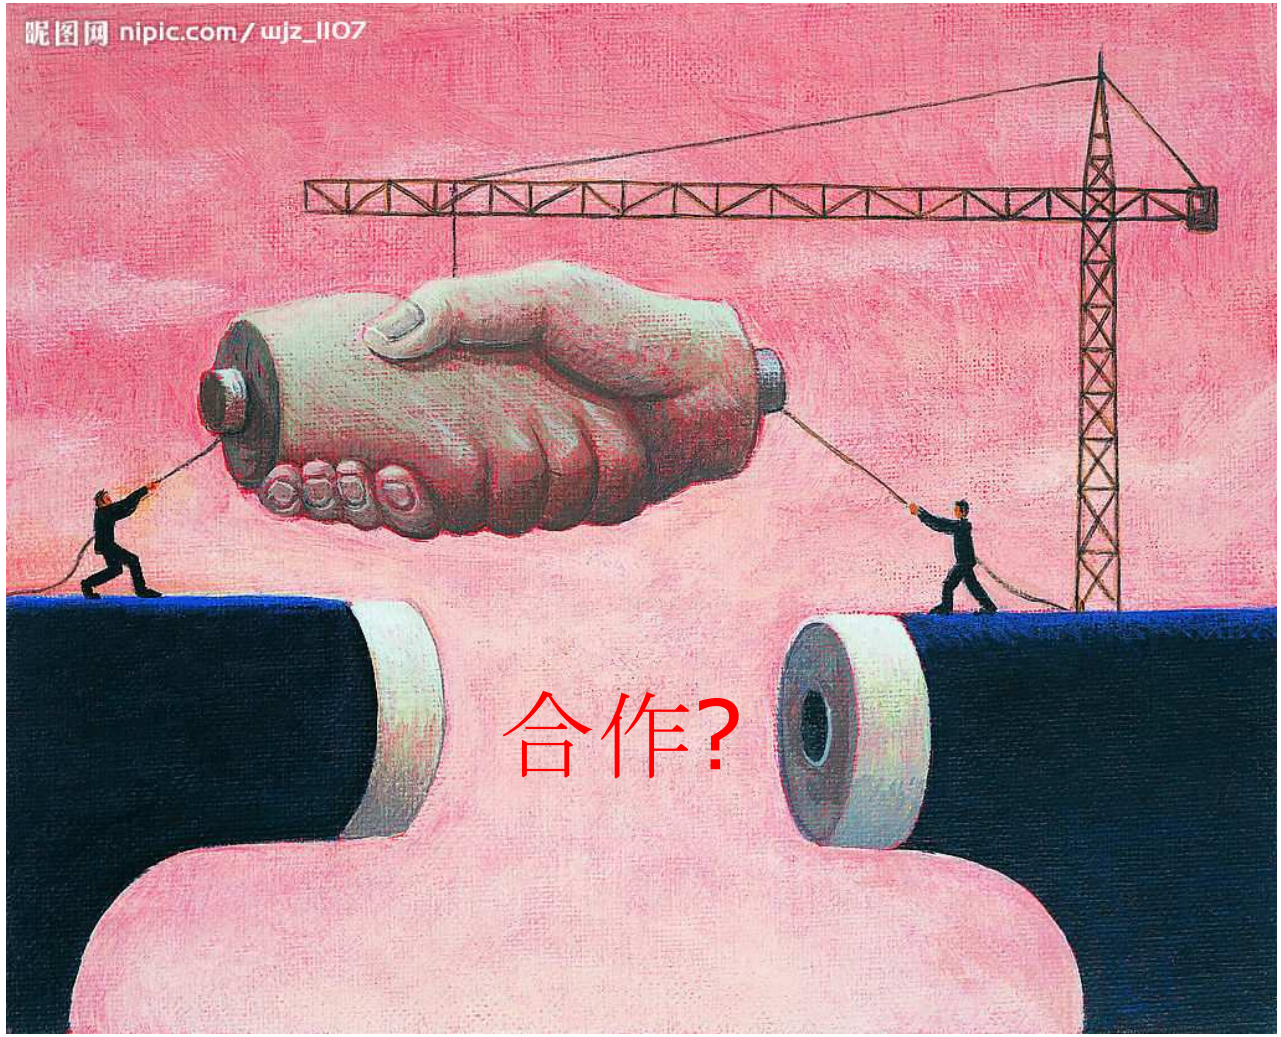


Why should the Nordic countries and China collaborate on energy and climate?

- Common challenge: Need for ”green transformation”, solutions for the future
- Multiple stakeholders with appetite for collaboration
- Considerable experience: Public-public collaboration, R&D, two-way investment, business partnerships, public-private partnerships, education, media
- Nordic innovation practices + China’s drive for ”indigenous innovations”
- Knowledge of each other’s markets
- Positive policy environment
- Visibility in Norden and China
- China’s market: Experience with scaling fast and in a big way

What should we do today?

- Reflect on previous inputs
- Collect ideas. Listen to the views and suggestions of the panelists on collaboration in climate and energy. Questions to be considered:
  - What will China look for in its cooperation with Norden the next 5 years?
  - What do the Nordic countries look for in their cooperation with China the next 5 years?
  - 2-3 ideas that will be viable to pursuse
  - What are the conditions for succesful cooperation, any examples?
  - Are there pitalls to consider?

- Moderator: Summarize; what is next?


Cooperation in the future?
