Challenges & Opportunities in China

1. The Chinese market is vast and is being developed very proactively in co-operation with the government.

2. We begin to see a clear direction towards quality solutions in the industry.

3. More foreign players (developers) in the Chinese market compared to before.

4. The Offshore segment is now coming into play and will attract a lot of interest from investors and developers.

5. Grid is still an issue, but we see large investments from the grid authorities to close the gap.

Thank you for your attention
