

Intelect

Incentives and cost calculations for electric transport in the Nordic countries

INTELECT

Two main objectives:

- Map vehicle taxation and available incentives in all of the Nordic countries
- Build online calculators to help customers evaluate the pros and cons of buying an environmentally friendly vehicle

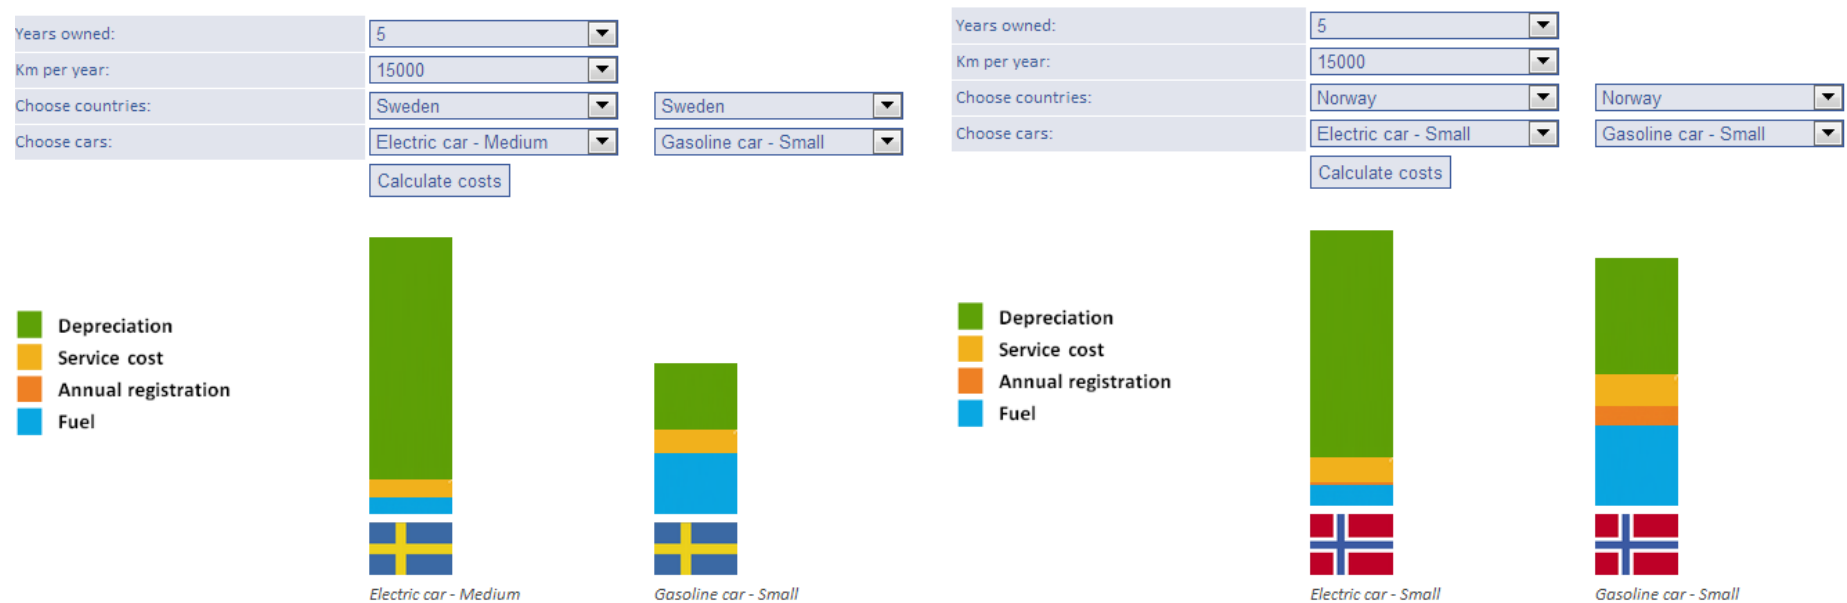

Taxation

- Import tax / CO₂ tax
 - VAT
 - Annual tax
 - Fuel tax
-
- Existing taxes gives the opportunity for low tax, same tax or higher tax policy.
-
- **Incentives can be used to help introduction of alternative vehicles**

Calculator A

- Rough estimate of TCO
 - Tool to get a quick overview

Purchase cost (€)		
Vehicle factory cost incl. shipping	40000	15000
Weight import tax	0	0
CO ₂ import tax	0	0
Other import taxes	0	0

Purchase cost (€)		
Vehicle factory cost incl. shipping	35000	15000
Weight import tax	0	4312
CO ₂ import tax	0	877
Other import taxes	0	344

Calculator B

Two similar sized vehicles from the same producer. Plug in hybrid v.s. gasoline

0%

20%

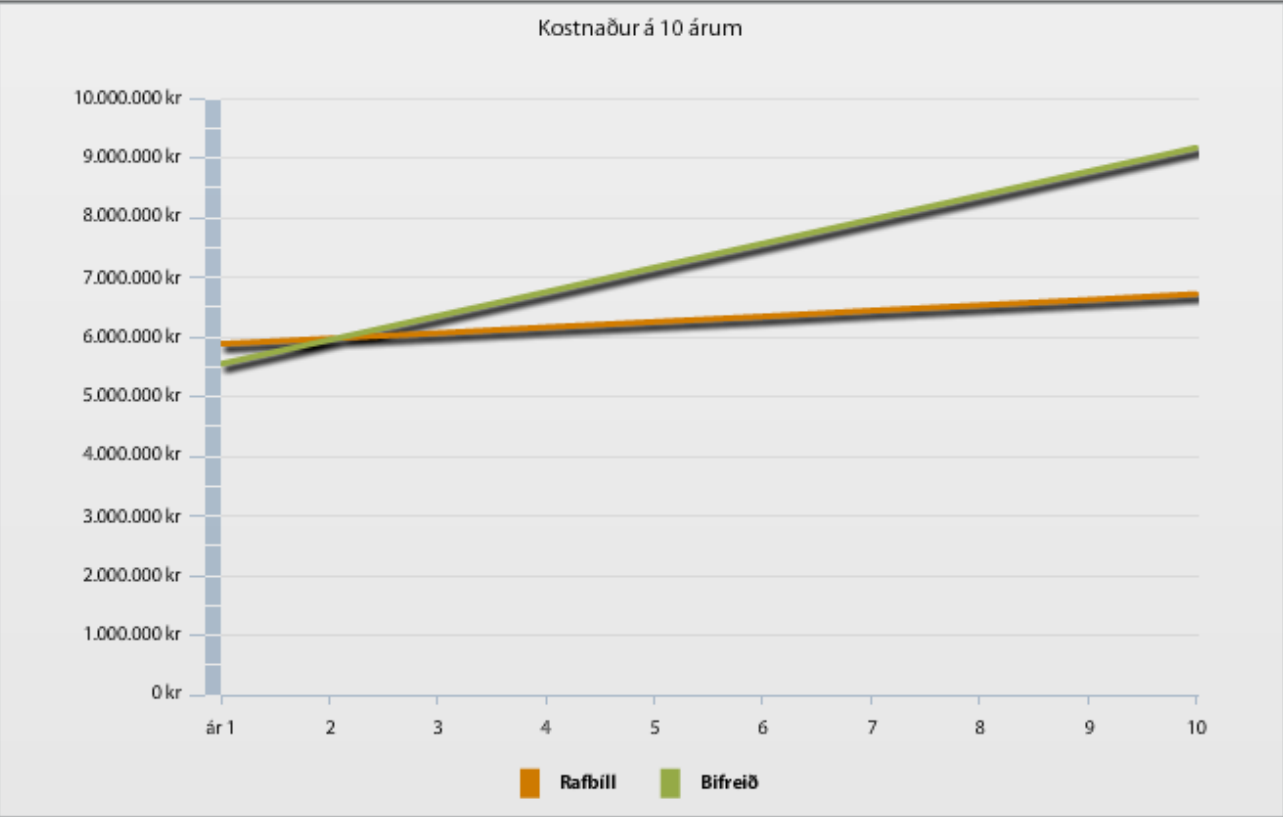

40%

60%

80%

100%

Mismunur			
Kostnaður:	309.179	kr	CO2 útblástur: 3.034 kg

Successful project

- Overview of what Nordic governments have initiated to stimulate the sales of electric/environmentally friendly vehicles
- Support tool for all interest groups working in the field of electric cars and alternative fuel
- Available in all Nordic languages:
