

# Bioenergy

Bioenergy must become the largest energy carrier in the Nordic region in 2050. How can we facilitate sustainable trade and advanced local production of biofuels?

# Smartgrids

How can the Nordic region tackle technological, financial and social acceptance issues connected to new infrastructure development?

Energy Way

# Transport

Transport must see the greatest emission reductions towards 2050. How can we better integrate Nordic efforts to achieve a more efficient, electrified, and bioenergy-based transport system?

# Energy Efficiency in Buildings

How can we accelerate the renovation of inefficient building stock in the Nordic region to realise energy efficiency gains?

# Energy Efficiency in Industry

How can the energy-intensive industries  
of the Nordic region realise significant  
gains in energy efficiency?

# Carbon Capture and Storage (CCS)

How can Nordic research, business and policy actors scale up action for this technology to reach its full potential?
