

Sweden's climate framework and the need for negative emissions

A **strengthened** climate framework

- 1 Climate goals
- 2 Climate law
- 3 Climate policy council

0

net emissions by 2045
and thereafter negative emissions

A national strategy

to achieve zero emissions from the heavy industry

- Investments in research and development
- Collaboration with industry
- CCS and bio-CCS

Climate policies that

- ① reduce emissions without stifling growth
- ② do not move our emissions abroad
- ③ create favorable conditions for innovation

Greenhouse gas emissions and economic growth in Sweden 2008-2016

Index 2008=100
