

Norwegian Ministry  
of Petroleum and Energy

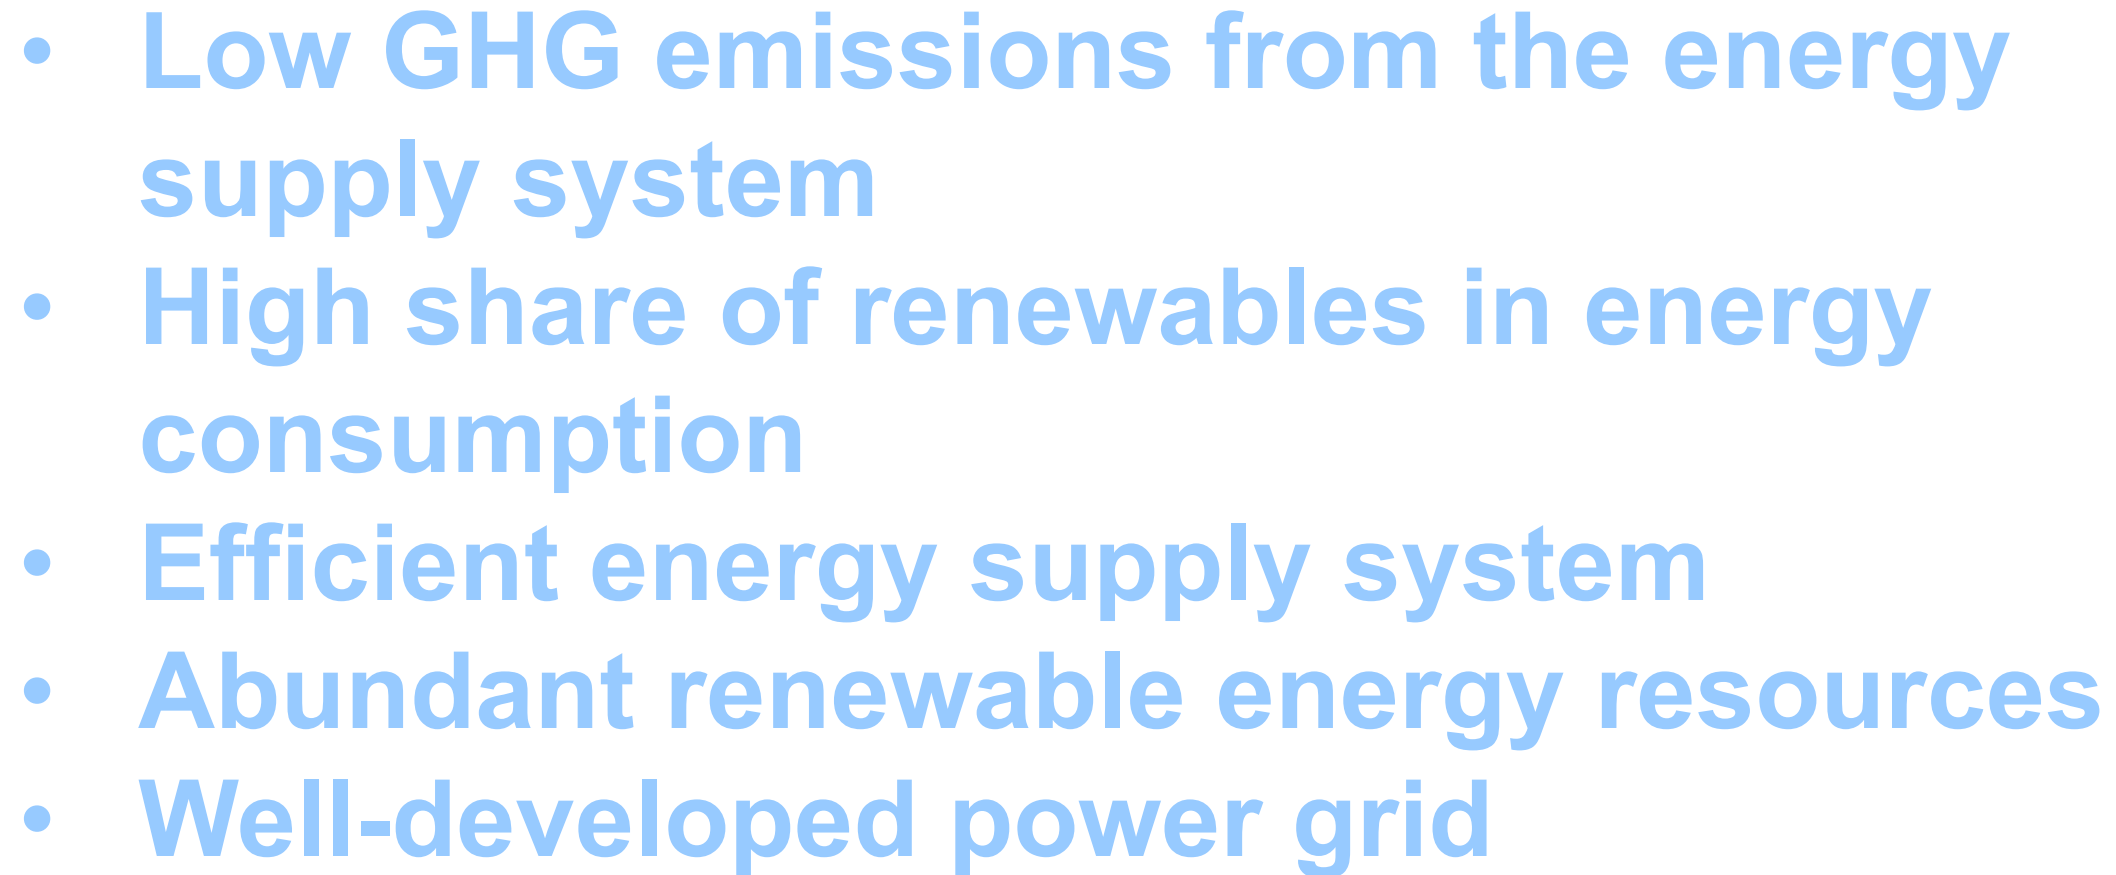

# Nordic Energy Commissions Compared

State Secretary Elnar Remi Holmen

Copenhagen 28. august 2017

# Key features of the Norwegian energy system

- 
- An aerial photograph of a Norwegian fjord, showing steep, green mountains and a calm body of water. The image is used as a background for the text.
- Low GHG emissions from the energy supply system
  - High share of renewables in energy consumption
  - Efficient energy supply system
  - Abundant renewable energy resources
  - Well-developed power grid

# White Paper on Energy Policy

Improving security of  
supply

Profitable  
development of  
renewable energy

## Meld. St. 25

(2015–2016)

Melding til Stortinget

Kraft til endring  
Energipolitikken mot 2030

More efficient and climate  
friendly energy use

Value creation based on Norway's  
renewable energy resources

# Security of supply

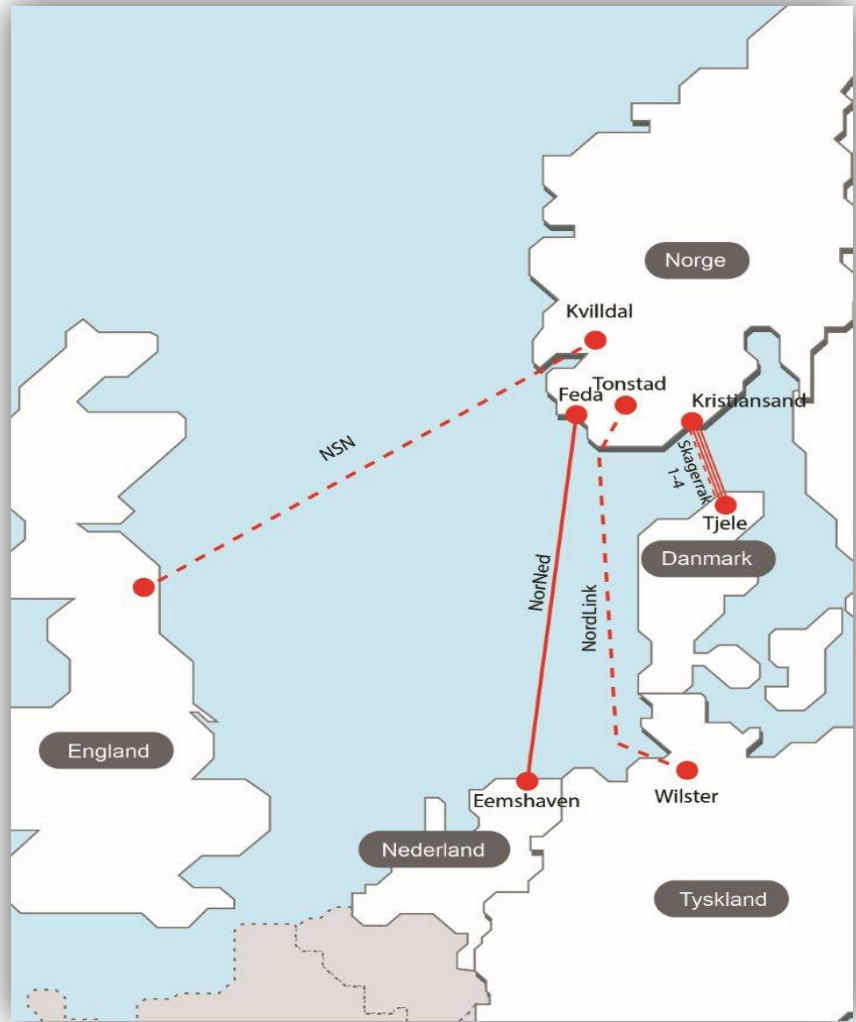

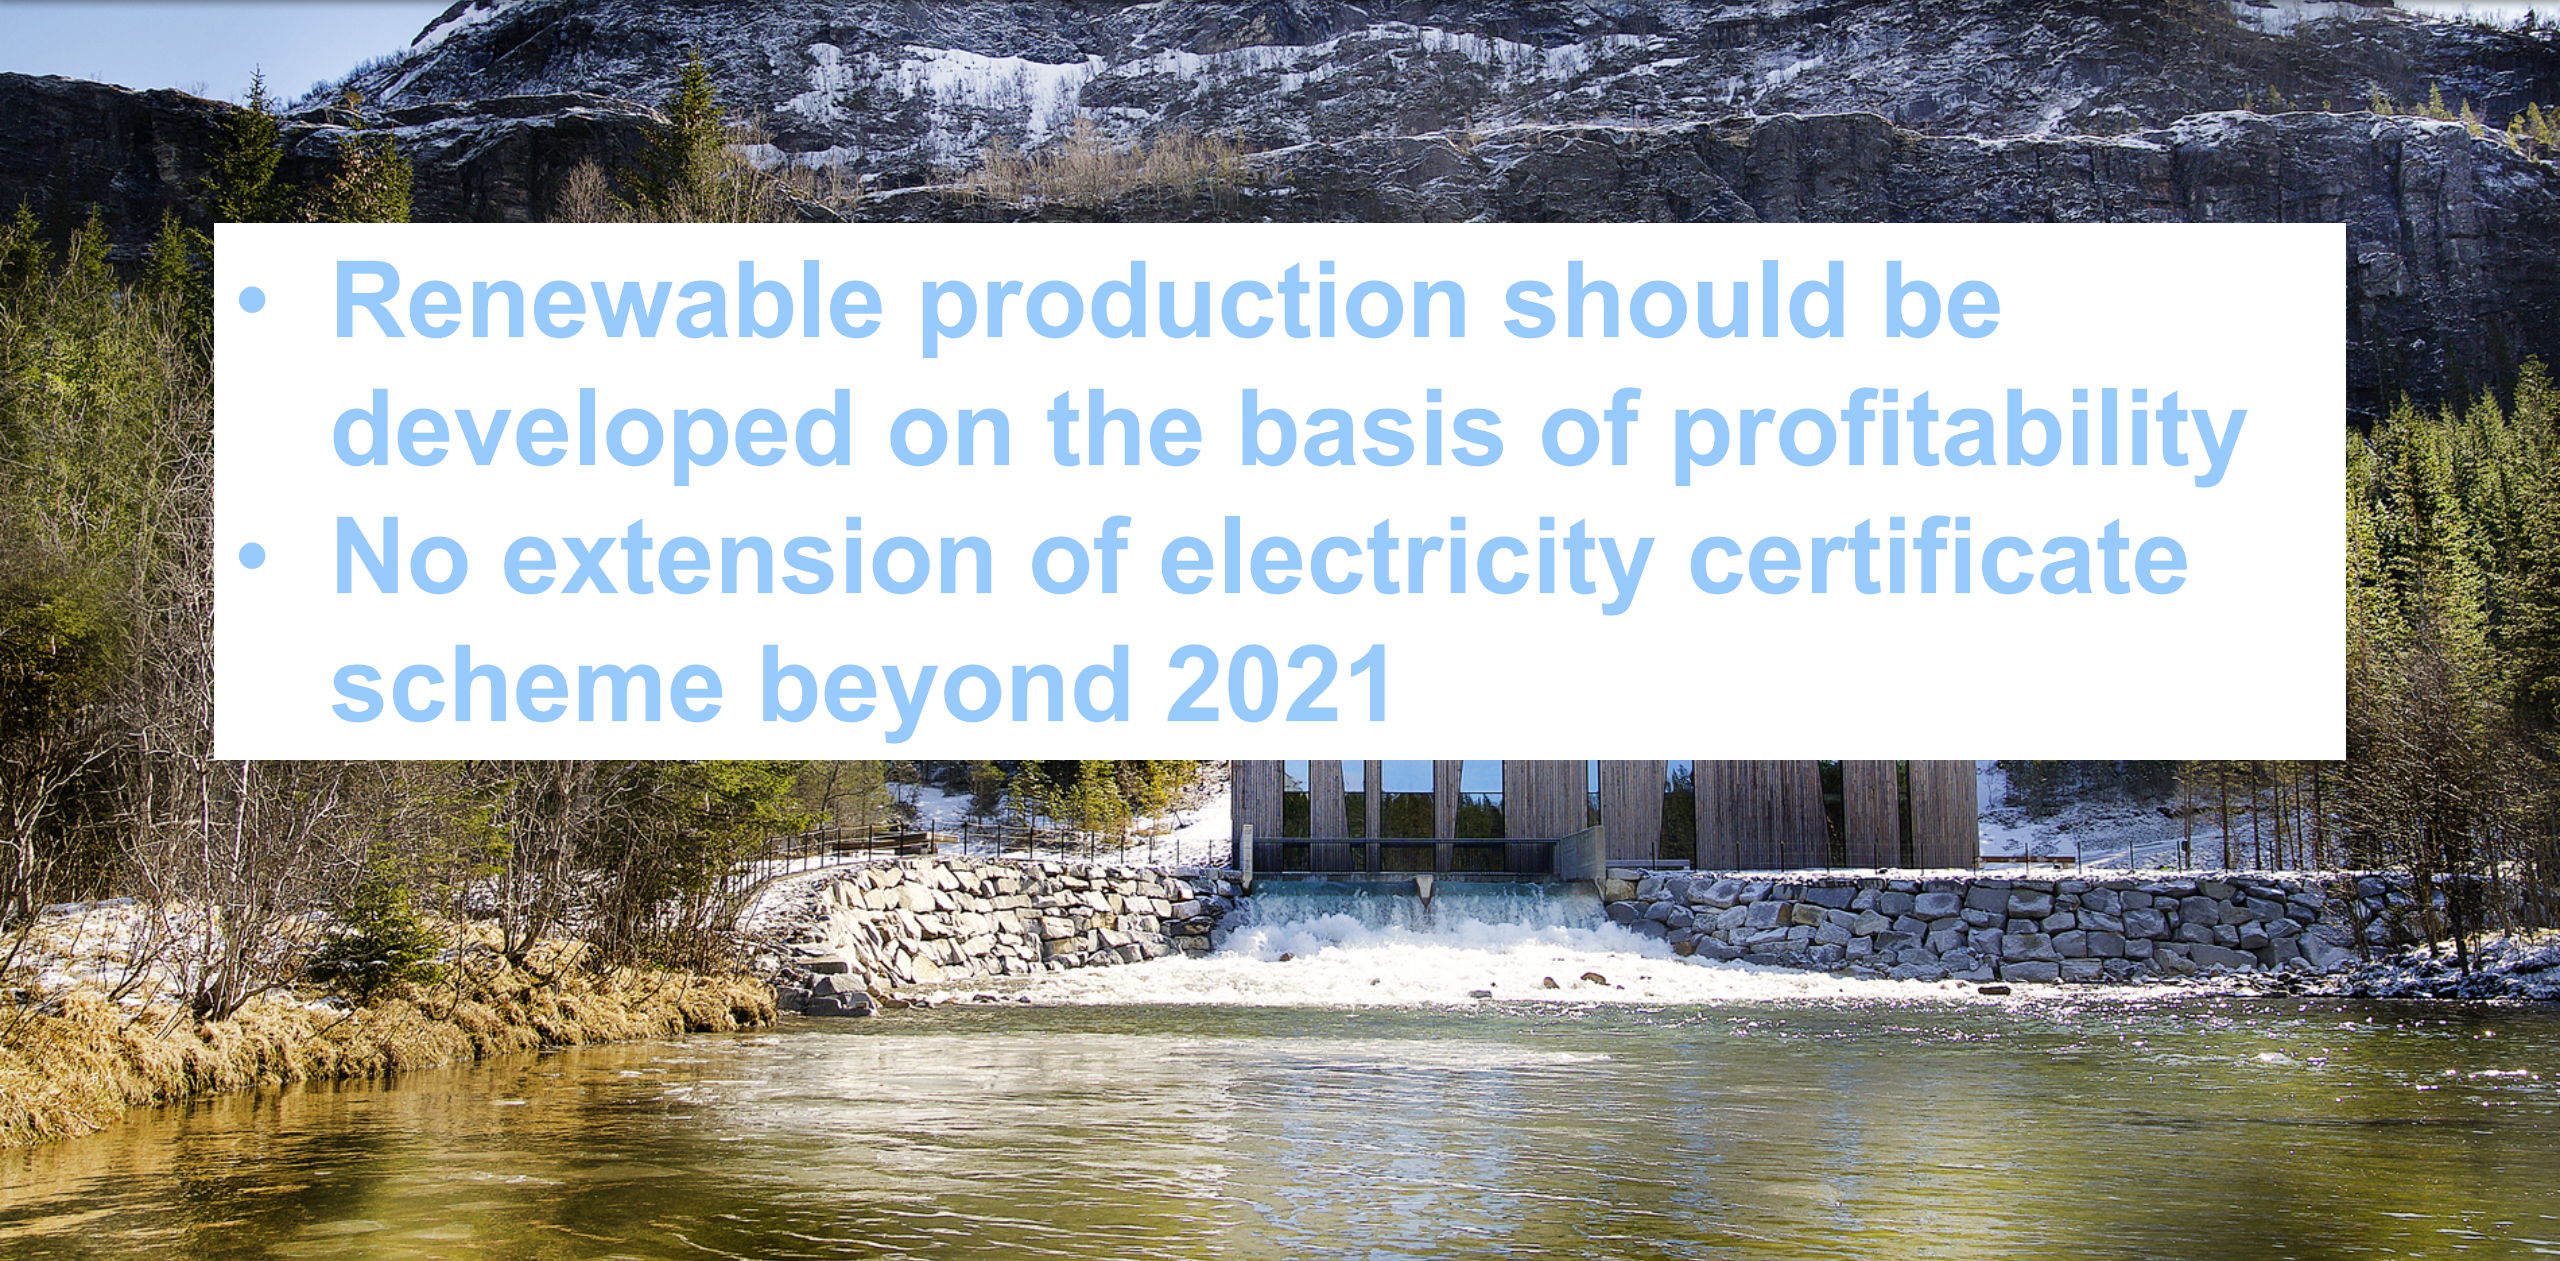

Illustration: Statnett

# Profitable development of renewables

- Renewable production should be developed on the basis of profitability
- No extension of electricity certificate scheme beyond 2021

# More efficient and climate friendly energy use

Norwegian Ministry  
of Petroleum and Energy

# Thank you for listening!
